PRAKTIK SISTEM KEAMANAN DATA

ENKRIPSI DAN DEKRIPSI

Disusun oleh:

Melia Madzrongatul Khoiriyah V3922030

Dosen:

Yusuf Fadlila Rachman, S.Kom., M.Kom.

PS D-III TEKNIK INFORMATIKA SEKOLAH VOKASI UNIVERSITAS SEBELAS MARET 2023

TUGAS INDIVIDU

- 1. Membuat fungsi enkripsi dan dekripsi teks menggunakan caesar chiper (desain bebas, minimal dapat menampilkan plaintext dan ciphertext sesuai contoh di modul).
- Bebas menggunakan bahasa pemrograman apa pun silahkan (Python, Java, PHP, dll).
- Kunci pergeseran yang dipakai sesuai dengan nomor absen masing-masing mahasiswa. Misal nomor absen 5, menggunakan kunci pergeseran 5.

Script

```
<!DOCTYPE html>
<html>
<head>
    <title>Caesar Cipher</title>
    <style>
        body {
            font-family: Arial, sans-serif;
            background-color: #f0f0f0;
            margin: 0;
            padding: 0;
            text-align: center;
        }
        h1 {
            color: #333;
        }
        label {
            display: block;
            margin: 10px 0;
            font-weight: bold;
        }
        input[type="text"],
        input[type="number"] {
            padding: 5px;
            width: 200px;
            border: 1px solid #ccc;
            border-radius: 5px;
            margin-bottom: 10px;
        }
        button {
            padding: 10px 20px;
            background-color: #007BFF;
            color: #fff;
            border: none;
            border-radius: 5px;
            cursor: pointer;
            transition: background-color 0.3s;
```

```
}
       button:hover {
